Sir:

In response to the Office Action dated June 4, 2007, please consider the remarks as submitted herewith on the accompanying pages.

**REMARKS**

Claims 1-6 are all the claims pending in the application.

In the present invention, a system control signal flows in the order of a remote controller, a base device (set-top box), and a display device. Meanwhile, in the cited reference, the system control signal flows in the order of a display device, a base device, and an external input device.

In more detail, the present invention relates to a system for controlling the display device using the remote controller of the base device (set-top box), whereas the cited reference relates to a system for controlling the base device and the external input device using the display device.
